Narrative: Detection aircraft 114MN flew the fire at 1800 hrs. The fire is running to the south and east. Two separate columns on the east and south flank made mapping difficult. The fire is 3/4 mile north of Poorman. The bridge and old structures at Sulatna Crossing are intact. The Poorman RAWS has been dismantled due to fire proximity. Firefighters started a burn-out north of a creek separating Poorman from the fire. It was estimated that the fire would reach Poorman during the night or by mid-day on 8/6. Infra-red mapping has been requested for this fire. The fire has a 90% active perimeter.

Narrative: An air tanker was brought in to drop a load of retardant on the northwestern corner, which was creeping toward the firefighters' base camp 1/4 mile north of the fire. Helicopter bucket work was also employed. The actions were successful in laying down a wet line so crews could make progress in direct attack. The fire made numerous runs and new hot spots were located in the interior. Crews continued to secure the lines around the north and west sides. There was a thirty-acre gain.

Narrative: Surveillance reported that the fire jumped Sheep Creek and was active on the SE, torching with flame height of 3-4'. Helitack load sent for structure protection. Load landed at 19:30 and made contact with the landowner. Priorities were set to protect the main house. Improvements were made along the creek bed for possible burnout. The area was scouted for a dozer line and construction of the line and improvements to the creek bed were initiated. Helitack returned to the station and may continue structure protection on 8/6.
