Narrative: Cooler weather today moderated fire behavior. High humidity decreased fire spread and intensity. Individual tree and jackpot torching were observed. The threat to commercial and private residences remains high. Crews in Division B (southern flank) tied into Crooked Creek to the east and are working back toward Division A to the west. Four additional crews were mobilized and are spiked out at a new spike camp established on the northern perimeter. Bucket work continued on the north and west flank. Plan for 8/8 is to secure line along the southern flank east and north to the Division A/B break. Structure protection assessment will continue along the Steese Highway and the Circle Hot Springs Road. Four crews in Division A will work from H-5 east and west, securing the northern flank. Helicopters will continue bucket work and support crews securing the northern and western flank. There was an injury to a firefighter, requiring transportation to Fairbanks for treatment. A 905 acre increase was identified based on updated mapping.

Narrative: There are 151 personnel on the fire. Crews completed struction protection in Medfra. Crews continued to construct direct handline along the southwestern edge of the fire from the North Fork Kuskokwim River to Scow Harry Creek. Personnel and supplies continue to be transported by riverboat due to limited visibility. Lower RHs and higher winds allowed active fire in many locations. A succesful aerial firing operation completed a burnout to tie the northwest corner of the fire into Scow Harry Creek.
