Name: **Milepost 85** Cause: Human Admin: **L&W**

Narrative: Smokejumpers worked with UAF researchers to locate all 3 research project RAWS. The RAWS believed to have been consumed was found intact, although the fire had burned around 3 sides. Smokejumpers constructed trench line to secure this site. Access corridor to second RAWS located. This site is in heavy brush and will require clearing. Researchers elected to leave data loggers in place and continue collecting data. Northwest corner of the fire continues to burn actively on both sides of Niagara Creek, but rate of spread is minimal. East side of fire has formed a number of long fingers and has reached, but not crossed Garfield Creek. Structures on Garfield Creek appear secure. Despite considerable growth, unable to map fire or determine acreage increase due to unavailability of aerial platform. The fire remains staffed with four smokejumpers.

A524 Lat: **65:32** Status: **S/U** Acres: **5,205.0** Option: **FULL**
231524 Lon: **144:36** Date Started: 8/03 Area: **UYD**
P00524 Legal: 008.0N 015.00E 11 F Date Out: Owner: **STA**
Name: **Ketchem Creek** Cause: Lightning Admin: **L&W**

Narrative: Crews made good progress along the northwest flank in Division A east and west of H5. Crews in Division B contained approximately 3 miles of the southern flank from the Division B/C break to H1 along the western flank. The structure group completed 80% of the on-site inventory of structures along the Steese Highway and Circle Hot Springs Road. Fire behavior moderated to smoldering and creeping under the influence of showers and high humidity. Plan for 8/9 will be to have crews continue to mop up to a 100 ft. standard and secure the line along the northwest flank in Division A. Crews in Division B will continue to secure line to H3 on the west flank. The structure group will complete inventory of structures and process the structure protection plan. the east flank (Division C) will remain unstaffed. The threat to commercial property and private residences has diminished to low due to wet weather. !

Assigned Crews: Delta #1 Type 2 Assigned: 8/5
Fort Yukon #1 Type 2 Assigned: 8/6
Fort Yukon #2 Type 2 Assigned: 8/4

	Name: Long Creek		Cause: Lightning	Admin: L&W

Narrative: Detection aircraft 114MN flew the fire at 1610 hrs. The fire was backing to the west, running to the east. There was creeping and smoldering in unburned fuels in the interior. Fire was creeping around Monument and Ophir Creek structures, but none had burned. Fire is 1/4 mile north of Flat Creek backing down the drainage. The plywood buildings at Poorman were intact. The fire had moved down west side of runway and was backing to the east where the RAWS tripod is located. This fire is not staffed.

A487	Lat: 67:22	Status: U/U	Acres: 180.0	Option: LIMITED

 Name: **Goblet Creek** Cause: **Lightning** Admin: **Doyon**

Narrative: Detection aircraft 114MN flew the fire at 1850 hrs. Fire status was also discussed with the IC. Fire fighters will check the west side of the fire where there was still some heat. There were internal smokes in the drainage southeast of base camp. These are expected to pose no problem. Demob is expected to take place on Saturday 8/10. This fire is staffed by an ICT3, a STCR, the Stebbins #1 Type II crew (16), the Galena Type II crew (8), a medium helicopter, a light helicopter, two HELB's, an SPUL, and a HESM.

Assigned Crews: Galena Type 2 Assigned: 8/5
 Stebbins #1 Type 2 Assigned: 8/6

Legal: 018.0S 001.00E 21 K Date Out: Owner: **FWS**
Name: **Khotol River** Cause: **Lightning** Admin: **INR**

Narrative: Detection aircraft 114MN flew the fire at 1950 hrs. Westerly winds were pushing the fire east. The fire is so far staying east of a creek separating the fire from allotments. The perimeter was 70% active. The fire was creeping to the east and south in tundra, hardwoods, and black spruce. The increase of 7680 acres is a best estimate from what could be mapped in the heavy smoke. This fire is not staffed.

Name: **Reindeer** Cause: Lightning Admin: **L&W**

Narrative: The south end of the fire was reconed and was found to be 90% active in tundra 2 miles from the lake. There was light rain over the lake and crews were working on structure protection. Str. leaders arrived on the fire and 6 SMJ's were demobed. There were steady south winds all day which pushed the smoke away from Reindeer Lake. The fire backed in the direction of the cabins. HCR staging was set up. No radio communication was established between the fire and staging yet. Surveillance reported that the fire was smoldering and creeping to the west. There was sporadic open flames from 1-3'. The fire was crossing Reindeer river with some torching. Two columns were observed within interior of NW perimeter. The fire was too smokey to see from the east perimeter. There were 41 personnel working on this fire.

Name: **North Fork** Cause: Lightning Admin: **L&W**

Narrative: Structure protection in Medfra in place. Crews continued to construct direct handline along the southwestern edge of the fire from the NorthFork Kuskokwim River to Scow Harry Creek. Personnel and supplies continue to be transported by riverboat due to limited visibility. Fire was very active in the interior of yesterday's burnout. Helicopters patrolled the burnout to ensure Scow Harry Creek is holding. There are 148 personnel working on this fire.
