Narrative: State detection aircraft 903AK flew the fire at 1830 hrs. The east and northeast perimeter was very active, where running and torching was observed in black spruce. Accurate mapping was impossible because the aircraft could not get in close enough due to heat and heavy smoke. The McGrath Situations Unit observer estimated an increase of 10,000 acres on the east and northeast side. This fire is not staffed.

Narrative: Today's observed fire behavior included creeping and smoldering with occasional torching in black spruce. Crews continued structure protection activities at Kindanina Lake, Kantishna River, West Twin Lake, Coy's Cabins, and Mucha Lake. A RAWs was installed today near Kindanina Lake. Widespread scattered showers in fire area kept fire behavior to a minimum. Potential for fire to require structure protection still exists on all flanks.
