Narrative: Today's fire behavior included creeping and smoldering with occasional torching in black spruce. Crews continued structure protection activities at Kindanina Lake, Kantishna River, West Twin Lake, Cabin sites, and Mucha Lake. The North Star crew moved from Mucha Lake to Kantishna River cabin sites. Strong west winds are accelerating fine fuel drying, significant fire movement is possible within 2-3 days. The potential for the fire to require structure protection still exists on all flanks. The predicted drying trend and continued west winds pose a threat for increased fire activity.
