Narrative: A Type II incident management team (Kurth) assumed management of the fire today at 1800. Crews continued structure protection and improved the perimeter adjacent to structures at Reindeer Lake by mopping up all smokes within 200 feet of structures. The fire remained active today on the west, southwest, northeast, and southeastern perimeters. Fire behavior has moderated somewhat due to lower temperatures, increased RH and overcast skies. Activity was minimal in the tundra but burning continued in spruce pockets with occasional torching. Light rain was received on the southern portion of the fire. Helicopters assisted with recon, moved equipment and supplies, and assisted with mop up operations. Fixed wing aerial recon and GIS mapping could not be completed due to visability.
