Narrative: Eight additional smokejumpers, the Midnight Sun Hot Shot crew, one engine, one water tender, and two SEATs worked the fire throughout the day to protect allotments on American Summit. Burn out operations were conducted along the Taylor Highway from American Summit south to King Solomon Bridge to keep the fire west of the highway. Allotments along the highway were secure. The temperatures started heating up early in the morning, by 1100 hrs the inversion had lilfted and intermittend torching was occuring. By the end of the day the fire was making runs all along the perimeter but there had been no spotting across the highway to the east.
