Narrative: Changes in weather caused increased fire behavior in the urban interface. A continuous flaming front with group torching and ground fire backing against the wind and slope was reported. Flame lengths in excess of 60 feet and spotting greater than 1/2 mile was observed. The fire is approaching the Chena Hot Springs Resort and adjacent private lands and structures. Up to 53 structures in the West and North Fork of the Chena River area remain threatened. Structure protection in these areas was successful. An additional 22 structures in the Angel Creek area remain threatened depending on weather conditions. Evacuation planning continued. An increase of 8,536 acres over a previous estimate was reported by infrared mapping aircraft 149Z. A total of 228 personnel are assigned to the fire.
