Narrative: Prior to afternoon showers, active surface fire and group torching were observed. The fire moderated following afternoon showers. There was little active burning around Chena Hot Springs Resort and West and North Fork Chena River. Structure protection continued to prove successful in those areas. Line construction and mop-up continued in the area west of Chena Hot Springs. Chena Hot Springs Resort and adjacent private lands and structures continued to be threatened. Up to 53 structures in the West and North Fork of the Chena River area remain threatened depending on weather conditions, in addition to 22 structures in the Angel Creek area. A public meeting was scheduled for 7/8 in the evening. A total of 263 personnel are assigned to the fire.

Narrative: Residents have been allowed to return to their homes but have been advised to remain alert in the event of increased fire behavior and potential future evacuations. Control efforts were hampered by a lack of escape routes and safety zones. The plan is to continue structure protection along the Steese Highway and mop up around structures that are no longer threatened. Direct attack action was initiated in full suppression areas (where possible) and point protection along Fairbanks Creek Road, also full protection, was preformed.
