Narrative: The evacuation of one residence and mining operation in Fairbanks Creek remains in place. Preparations to burnout along Fairbanks Creek Road and evaluation of control operations to protect Chena Hot Springs Road, Haystack Subdivision, and the Elliot Highway corridor continue. Concerns remain for residences and subdivisions in Fairbanks Creek and Chena River Hot Springs Road , where over 500 residences may become threatened. Predicted winds beginning 7/18 are expected to increase concerns for fire in the Little Chena Drainage. Infrared is a critical need because of unknown perimeters and heat.
