Narrative: The evacuation of one residence and mining operations in Fairbanks creek remains in place. Burnout, holding actions, and favorable weather are crucial to the protection of Chena Hot Springs Road, the Haystack subdivision, and the Elliot Highway Corridor. Concerns remain, subdivisions in Fairbanks Creek and Chena Hot Springs Road, where over 500 residences could be threatened. East and northeast winds are predicted, beginning 7/18, increasing concerns of the fire getting into the Little Chena Drainage. There is continuous black spruce aligned with the City of Fairbanks and out-lying subdivisions. IR mapping will be requested every day because of the rapidly changing fire perimeter and smokey conditions. PNW Team 3 arrived and will begin to transition on 7/18. Thunderstorms occurred over the western half of the fire late in the afternoon. Structure protection remains in place and 800 personnel continue staffing this fire.
