Narrative: Evacuation of Haystack Subdivision, including approximately 80 residences remains in place. Evacuation of one residence and mining operations in Fairbanks Creek remains in place. The fire continues to move through the White Mountains National Recreation Area toward the Elliott Highway Corridor where pumping stations for the Trans Alaskan Pipeline are located, along with the Haystack subdivision with 80 residences. Burn out, holding actions and favorable weather will be needed to protect the area. E/NE winds predicted to begin this evening will increase concerns for fire in Little Chena drainage which has continuous spruce cover aligned with city of Fairbanks and outlying subdivisions. Heavy smoke again affected air operations.
