### narrative:
- Crews closed one spike camp and pulled hose and supplies from the Pogo Mine area. A spot fire one mile to the north was declared a spot from this fire and will be included in the acreage. Demob continued and fire activity was very low with some creeping and smoldering.
- A total of 66 personnel remain on the fire, as it continues to be monitored from the air.
- The fire continues to be aerially monitored.
- The fire was not flown and remains in monitor status.
- Fire behavior was generally limited to scattered areas of smoldering and subsurface heat.
- Approximately 0.8 inch of rain fell on most of the fire over a 24 hour period, severely diminishing fire behavior. Given the adverse atmospheric conditions, rehab and mop up progressed safely on all divisions. 384 personnel remain actively suppressing the fire.
