424 Name: **Bolgen Creek** Cause: **Lightning** Admin: **Danzhit**

Narrative: With the higher temperatures and lower RH's, the fire experienced increased fire activity and general perimeter growth. Mop-up continued around structures north of Quartz Creek and north of Central. Structure protection measures were established and maintained throughout the Central and Circle Hot Springs developed area, and at numerous isolated residences, north and south of the Steese Highway. Line resources continued to construct and reinforce containment and contingency lines to protect structures and other improvements. Helicopter bucket work was utilized on spot fires within Division Echo to keep the fire north and east of Crooked Creek. Burnout operations are ongoing in Division Echo south of the Steese Highway, at the time of this report. Flagstaff IHC was flown to the NE section of Division Echo, and will spike there this evening. Payson IHC and Minto were flown to the SW corner of Division Echo, and will be flown out due to the lack of suitable camp locations. Snag abatement measures along the Steese Highway from Central to Quartz Creek are continuing. The Steese Highway snag mitigation group is assisting the Alaska Department of Transportation with a mud slide in the vicinity of Mile Post 137, caused by melting permafrost. Rehabilitation planning is ongoing. Total personnel on the Central Complex (where Bolgen Creek was again the main concern on 8/17): 609.
