432424 Lon: **144:21:08** Complex: **Central** Start Date: 7/14/04 Area: **UYD**
PDA7T1 Legal: 10N 16E 11 F Out Date: Owner: **NCA**
424 Name: **Bolgen Creek** Cause: **Lightning** Admin: **Danzhit**

Narrative: The Red Flag Warning was dropped for the main Bolgen Creek fire area. Fire activity varied from moderate to high. The southwest flank of the fire continued to be active, but with slower advances than during the past two days. The persistent smoke inversion held in the valleys until about 15:00. Air operations were limited until mid-afternoon; then were utilized extensively for crew support, bucket work and reconnaissance operations. Mop-up continued around structures north of Quartz Creek and north of Central. Structure protection measures were maintained throughout the Central and Circle Hot Springs developed areas, and at numerous isolated residences, north and south of the Steese Highway. Excellent progress was made in all divisions. Burnout operations continued with the Boise and Sawtooth IHCs along the Steese Highway, west of Central and north of Crooked Creek, into the Porcupine Creek drainage. Helicopter bucket support was utilized to support mop-up in several divisions. Sang abatement measures along the Steese Highway from Central to Quartz Creek continued. A planned IR flight was conducted in Division Echo, southeast of Central, and north of Crooked Creek, and on the spot fire northeast of the main Wolf Creek fire. Hot spots were detected adjacent to perimeters in the heavier conifer fuels. The majority of the areas with lighter fuels were cold. Personnel assigned to Central Complex (in which the Bolgen Creek fire is the major component): 639.

Assigned Crews:		Assigned:	
	Beaver	Camp	8/14
	Boise	Type 1	8/10
