Narrative: Fire activity was smoldering, creeping and had occasional torching. The extreme drought conditions have created deep-seated burning which is creating significant amounts of blow down which is adding to the ground fuels and increasing fire activity. The majority of increased fire acreage was along the western side of the Crawford Creek area. Personnel are continuing with habitat improvement and fuels reduction. There are 11 personnel staffing this fire.

Narrative: Wind speeds of 15 to 18 miles per hour were observed along southern flanks of all complex fires. Temperatures in the 70s and humidity in the 30% range helped fuel the increased fire behavior. Observed fire behavior on the complex was crowning and intense surface fires, with well developed plume domination. Mop up areas that were not influenced by high winds progressed well. Direct attack and mop up will continue on the Gardiner Creek fire where conditions allow. Assessment of fire behavior and growth from the previous operational period will dictate adjustment in tactical strategies on the complex. Total personnel: 123.
