Narrative: FEMA declaration for Bolgen Creek Complex ended at 24:00 on 8/31/2004. Continued systematic mop-up and structure protection on the Homestead Road. Significant progress was made. Hand crews constructed lines between Steese Highway and Birch Creek at Mile Marker 142.25 to protect the Native Allotment in Section 34. Engines patrolled Steese Highway from Eagle Summit to 12 Mile Bridge. Hand crew completed saw work in preparation for rehab by excavator on dozer line near Circle Hot Springs Subdivision. Excavator completed rehabilitation on dozer line north and south of Circle City. Rehab of section of line on Pioneers of Alaska property determined to not be practical until after freeze-up. Aerial recon of Steese Highway between Central and 12 Mile Bridge. Snag hazard abatement along Steese Highway continued. Public interest is being met by IOF activities through outreach within the community. Removed evacuation and safety zone signs around Central. Personnel assigned to Central Complex (Bolgen Creek is the major component): 85.

 Narrative: The fire was flown and no open flames were seen, but there was a considerable amount of smoke on the western third of the fire in the Moose Creek area. The fire continues to creep along the upper ridges and back down into the creek drainages. There was very little precipitation received by the fire and there was good progress toward completing the fire break area around the cabins on the private lands.
 An acreage change occurred on 8/31 due to better mapping.

Narrative: South winds at 5 to 7 miles per hour were present all operational period in the complex. No rainfall was recorded on the complex. Low temperatures (65 degrees) combined with 35 percent relative humidity limited fire behavior to intermittent torching and creeping. Numerous pockets of black spruce on the fire perimeters and interior islands continue to burn throughout the night. On the Gardiner Creek fire, crews will continue assessing further deployment of suppression equipment in an effort to continue mop up of active perimeters. New arrivals of resources and personnel rotations continue throughout the complex.
