PNBRD2 # 094 Name: **Island Lake** Cause: **Lightning** Admin: **FOR**
 Narrative: Observed fire activity included torching and creeping, with short runs in unburned pockets of the interior. Direct attempts to control the perimeter and expanded mop up continues without using water. Water has proven to be very effective, as the fire burned shallow. Some areas require more intensive mopup and show high resistance to control. The overall fire looks good, but still has great potential with the returning warm, dry weather.
