 # 210 Name: **Sheenjek River** Cause: Lightning Admin: YFR
 Narrative: The National Weather Service issued a Fire Weather Watch for high winds over the area through Saturday night. This easterly flow will challenge control lines, natural barriers, and the 2004 Winter Trail fire area. The primary fire carrier has been open tundra, brush, and hardwoods with mixed white spruce and black spruce stands are also carrying fire. Two spotfires have found their way over the Sheenjek River. All these spots have been secured and mopped up. Strong gusty winds extended the fire perimeter primarily on the north side. Spruce pockets directly along river edges presented control problems with torching and small runs.
