# 210	Narrative: The weather continues to be hot and dry with low RHs and no rain forecasted for several days. Secured oxbows within the Porcupine and Sheenjek River corridors still hold fire in large stands of spruce and these can potentially spot across. 3 Type 1 crews continue to move northeast and extend direct line toward the Winter Trail(2004) fire area. Crews have reinforced the southern perimeter and areas adjacent to cabins and allotments. Ground-truthed Fire Hawk imagery which resulted in increased acreage accuracy. Plan to hold and improve the western perimeter, patrol and monitor cabins/allotments along the Porcupine River. Will evaluate need to burnout in NE corner of fire to prevent fire from reaching the Sheenjek. Fire continues to burn ahead of control lines to the northeast and can expect additional acreage gains.
