 # 210 Name: **Sheenjek River** Cause: **Lightning** Admin: **YFR**
 Narrative: Drought like conditions with no expected precipitation in the forecast will increase the potential fire growth in the northern sections of the fire. Falling water levels in the Sheenjek and Porcupine Rivers are hampering crew movement with boats. Black spruce is exhibiting crowning and torching with short distance spotting of 100-300 feet. Three to 5 foot flame lengths were observed in the hardwoods. Crews continue to mop up and secure established fire lines around cabins and allotments. Burnout operations were completed along the Porcupine River. Team monitored NE corner of fire as well as evaluated allotments and cabins North along the Sheenjek River.
