210 Name: **Sheenjok River** Cause: **Lightning** Admin: **YFR**

Narrative: Continuation of drought like conditions with no expected precipitation in the forecast will increase the fire growth in the northern sections of the fire. Falling water levels in the Sheenjek and Porcupine Rivers are hampering crew movement with boats. Black spruce is exhibiting crowning and torching with short distance spotting of 100-300 feet. Three to 5 foot flame lengths were observed in the hardwoods. Slow backing fire in northeast corner of the fire. Crews continue to mop up and secure established fire lines around cabins and allotments. Team monitored NE corner of the fire as well as evaluated allotments and cabins north along the Sheenjek River. The Denali and Chena Type 1 crews in addition to the Northstar Type 2 crew were demobed for days off. 190 personnel assigned. A gain of 200 acres from yesterdays report.

**Note the correction on crew demob, Pioneer Peak Type 1 crew is still on the fire. The Northstar Type 2 crew was released for days off.
