Narrative: The fire was flown by zone surveillance in 309VS. The smokejumpers reported that the skies were overcast all day with some wind, but no precipitation. The portion of the fire south of the Kanuti River was fairly inactive, but the portion north of the Kanuti River was extremely active. Most of the fire movement occurred during the previous night. The smokejumpers completed mop-up of burnout operations utilized to protect identified sites near the mouth of the Kanuti Kilolitna. They prepared the Fish and Wildlife Service repeater site on Hill 1606 for a possible burnout should that become necessary. Fish and Wildlife Service canoes were moved to a safe location, and the jumpers began planning the defense of identified sites on the west side of Kaldolyeit Lake. Updated mapping indicates a slight decrease in overall acreage. (-3159 ac.)
