The fire was about 1 mile from permitted cabin #2 and an additional 4 smokejumpers were deployed to burn out and mop up around that site. Helicopter 80T was used to shuttle smokejumpers from the jump spot to the cabin. The fire activity was reported to be quite active.

 # 452 Name: **Boundary Creek** Cause: **Lightning** Admin: **Doyon**

Narrative: Operations are going as planned, dryer weather allowed crews to complete a portion of the line burnout. Dryer weather increased fire behavior with short crowning runs and increased backing fires observed, in uncontrolled portions of the fire. Two type 1 crews and a type 2 helicopter were shifted to help with the Mission Creek fire. The Boundary creek fire grew approximately 1000 acres due to dryer weather and the planned burnout. The burnout went as planned from H-17 to H-20 securing additional line. With the predicted weather the fire will continue to spread south up the head end of Quartz Creek and an unnamed creek along the US Canadian border. Additional burnout operations are planned during the next operational period to secure more line. This fire and the Mission creek fire are sharing resources.
