483 Name: **Mission Creek** Cause: **Lightning** Admin: **Doyon**

Narrative: Tough terrain and lack of water sources significantly hindered control efforts. The fire continued to grow with backing and short crowning runs. Things heated up again late in the afternoon. The crews made significant progress holding line on divisions X and Y. The fire has not crossed Mission Creek as of this writing. Water sources are being developed to assist in holding operations 7/24.

# 452	Name: Boundary Creek		Cause: Lightning	Admin: Doyon

Narrative: Crews burned and held approximately 4 miles of control line from H-20 to just short of H-18. More line is planned to be burned during the next operational period with favorable weather. This successful burnout operation sent smoke plumes high in to the atmosphere. All operations were very successful. Most of the fire growth was a result of burnout operations. This textbook burnout operation was well implemented by line resources. Smoke and heat pulled in to the fire away from control lines with no holding problems. The next day's plan is to continue to hold line and push ahead with burnout operations down the west side of the fire. With the fire is expected to continue spreading by spotting and backing to the south and in to the Boundary Creek drainage. Containment of the north flank is likely if the weather holds, reducing threat to the Eagle significantly. The fire currently is approximately 13,000 acres in the United States and 2,500 acres in Canada. 339 Personnel are assisting the suppression of this fire.
