# 278 Name: **Old Dummy** Cause: **Lightning** Admin: **KAR**  
Narrative: The fire was monitored by zone surveillance in N309VS. The fire was 5% active on the east side, smoldering in hardwoods along the drainages. The fire had backed into most of the drainages on the east side and was holding there. There was no further movement toward Sethylemenkat Lake. The furthest west portion of the fire was 50% active. It was backing in spruce and lichen and had moved 1.5 miles to the southwest. The west perimeter is backing into a patchy old burn that appears to be slowing it down. The southeast perimeter was backing into the hills with limited activity. The entire fire increased by approximately 3,000 acres.
