Narrative: 9G Base requested forestry to respond to an out of control grass fire out of the VFD service area, at mile 12 of Clark/Wolverine Road. Two engines and helitack responded. When the fire was reported, it was threatening structures. On arrival, helitack confirmed a 3.0 acre grass fire that had consumed a barn and mobile home. Helitack used tools and fedcos to attack the main portion of the fire. 212EV put buckets on the section of the fire that was threatening 3 additional structures. Muddy conditions prevented the engines from proceeding, and the personnel were shuttled to the fire by ATV. A ten person, "Gannet Glacier" crew was mobilized, and set up hoselays and a portable water tank. One local VFD water tender was ordered to supply water for a large berm pile that was continuously smoldering. Prevention's investigation revealed the fire's cause was escapement from the burn pile. It spread into the grass, and then to structures and vehicles. The fire area was gridded and cold trailed. A few smokes were found in the burn pile. Crews departed overnight, and will return at 0800 to grid the fire a final time. The fire was placed in monitor status.
