163 Name: **Parks Hwy** Cause: **Human** Admin:

Narrative: Light precipitation and higher relative humidities experienced over the fire area assisted crews in mop up and the securing of structures. Several divisions were contained. Structure protection assessments were expanded down the Parks Highway corridor in anticipation of wind shifts that could drive the fire south. Crews continue preparing the dozerline for burnout operations. The management team anticipates that the southeast flank of the fire will continue to be the most active in northwest winds. This would relieve the Parks Highway corridor of further fire spread, instead the fire would move into the old Fish Creek fire scar.
