Narrative: Numerous smokes continue appearing within the interior and along the southeast perimeter. The northeast flank is actively spreading on the south side of the Tanana River toward the mouth of Tatlankia Creek and the Wood River. Assessment of dozer lines, future structure protection needs, and destroyed structures has been completed. Some equipment, overhead, and crews are in the process of rotating out for days off, and will be released. Burnout operations around cabins will continue, as needed, during the next operational period. Personnel will continue to closely monitor the Tanana River, by boat, for smokes on the north side. Mop up and securing line continues, beginning at the Fish Creek fire scar. Fire growth is anticipated to be concentrated on the northeast flank, spreading south of the Tanana river toward the mouth of the Tatlanika Creek and Wood River. The finger on the east side of the Totatlanika River is expected to continue growing toward the southeast. Interior pockets of unburned fuel will continue to burn out.
