Narrative: Fire activity included smoldering and isolated torching in spruce stringers. The northeast side of the fire remained moderately active with pockets of the fire progressing slowly to the east. The weather is expected to remain dry for the next few days. Fire activity moderated due to decreased winds and slightly higher relative humidities than have been observed in the past few burning periods. The fire remained active on the northeast side and continued pushing east toward the Wood River. It is now within 1/4 miles of the cabins and allotments near the mouth of the Wood River, however, has not crossed to the East side of the Wood River in Div. E. Smokejumpers and a crew continue to work the area. Progress in Div Q is steady but slow going due to a finery perimeter. Div. A, B,C, and D are looking good along the Parks Highway corridor and crews continue to work East of Nenana airstrip South of the Tanana River. Planned actions include Engines in Div. A, B, C, D patrolling for smokes. Saw teams will mitigate hazard trees near residences and continue to mopup east of the Nenana airstrip. One task force leader will be designated for initial attack. For Division E: continue to monitor fire activity along the Tanana and Wood Rivers, and if conditions warrant, prepare for burnouts around the cabins. Two crews and the jumpers are assigned to the Division. Division T and Q will continue to mopup 300 feet in from the Perimeter. The Temporary Flight Restriction for this fire has been cancelled.
