307

Name: **Teklanika**

Cause: **Lightning**

Narrative: Low RH recovery and winds pushed the fire through the tundra early on. Helicopter 973 with a bucket, retardant, and more personnel were ordered. The fire made a significant run to the north from a spot fire. It was very active in the tundra and burned through the retardant lines. 4 foot flame lengths hindered direct attack. 814EH was ordered from Tok, and both helicopters used buckets and supplied logistics support into the evening. Tussocks abound making work on the ground difficult. Numerous structures to the north along, the Tetlanika River, remain threatened. The fire grew 130 acres. Two crews have been ordered for arrival during the next operational period. The plan is to contain the fire at creeks to the north, preventing it from reaching the Tetlanika River.
