Narrative: The fire, originally reported at 20 acres has increased to approximately 80 acres 212HL with a helitack crew of 4 responded to a 10000 foot column and reported the fire was burning in heavy spruce. The fire was burning on a ridgetop, moving north, crowning, traveling 3 chains an hr, 90% active, with isolated to continuous torching on the west side. It was backing into a drainage on the south slide, with potential for another run upslope. Predominate fuels are grass and tundra on the east and south sides. The north side of the fire has a 10% slope with 3/4 mile of continuous spruce until it hits a ridge barrier. There are currently no visible threats within a 2 mile radius. At the time of observation the winds were from the south, and the column was being pushed to the NE. Quarter mile crowning was observed on the east flank as 212HL was departing back to the helibase. The fire is in a limited protection area burning on State land, and will be monitored.
