Personnel suppressed small spot fires that crossed the Dillinger River near the confluence of the Dillinger and South Fork of the Kuskokwim River. Personnel will continue site protection and evaluate fire progression on the south side of Dillinger Creek for possible firing operations. Slopovers on the south side of the Dillinger River present the most concern to personnel at the structure sites if the winds shift to the NNE. The fire has the potential to more than double in size with current conditions. Structure protection equipment was flown into Farewell staging.
