Narrative: At 1723 smokejumper aircraft N107BH (J-07) discovered this fire approximately 15 miles west of the village of Tanana and south of the Yukon River. At that time the fire was 10 acres in size, 100% active and torching in black spruce. The fire plotted in a full management area but no structures were threatened. By 1740 the fire had grown to 30 acres in size. Due to the rapid growth and extreme fire behavior, it was determined that the fire was not catchable with the resources at hand. No action was taken and the fire was placed in monitor status. The final acreage as mapped by zone surveillance in N309VS was 115.4 acres.

 # 282 Name: **Winter Trail** Cause: **Human** Admin: **CALIS**

Narrative: High winds hampered containment efforts once again. A lack of natural barriers in the area is making containment difficult. The fire has moved off the immediate river corridor in to an area with a large black spruce component and continues to move NW. The cloud ceiling in place over the fire burned off by mid afternoon, and in combination with increased SE winds, led to a sudden increase in fire activity. Fire behavior progressed from creeping and isolated single tree torching to group torching, running, and short range spotting in the afternoon. Crews continued to build and secure line along the flanks of the fire. Good progress was made from the anchor point down both flanks in the morning. The head of the fire was worked throughout the day by aircraft, which was ultimately unsuccessful. The fire burned through a wet area with a creek, and increased in intensity when it progressed back into an area of heavy spruce component. The fire gained approximately 500 acres. A TFR has been placed over the fire area.

 # 281 Name: **North Fork** Cause: **Lightning** Admin: **MTNT**

Narrative: Fuels and weather challenged firefighting efforts. The fire is in an area previously burned in 2004, in which a heavy component of downed and dead black spruce remain. This led to some reburn in the interior, in which the fire ran and escaped previous containment, aided by erratic winds. Tanker 55 was requested and responded out of McGrath, dropping one load of retardant to stop the spread, which amounted to a 1 acre increase. Additional resources were sent from McGrath on Helicopter 920 to assist. Helicopter 920 also provided bucket work. Firefighters will continue working to secure the perimeter.
