# 347	Name: Rock Slough		Cause: Lightning	Admin: YFR

Narrative: At 1503 the fire was flown by zone surveillance aircraft N9011N. The fire was 100 acres in size, 95% active, smoldering and creeping at the tail with group torching and 100 foot spotting at the head. Flame lengths were 5-10 feet in black spruce and tundra fuels. Due to the proximity of allotments and cabins to the south of the fire along Rock Slough it was determined that fire personnel would mobilize to the area and begin allotment protection operations. Zone helicopters N16920 and N36PF shuttled the North Star type 2 crew and additional FSS personnel into the Rock Slough area. Two orders of para-cargo were delivered by smokejumper aircraft N112BH. The crew began cutting in a sawline around the first allotment.
