# 347 Name: **Rock Slough** Cause: **Lightning** Admin: **YFR**

Narrative: Heavy smoke prevented zone surveillance from attempting to map the fire, therefore, fire personnel were unable to estimate a current total acreage for the day. The fire showed moderate fire behavior as smoldering, creeping and isolated group torching continued in black spruce, hardwoods and tundra. Crews finished burnout preparations on two allotments. One load of smokejumpers was ordered and received for allotment protection. Fire personnel continued their on going assessments and preparations of remaining allotments. Crews continued to mop up the burned out areas around the allotment across from the spike camp.
