 # 347 Name: **Rock Slough** Cause: **Lightning** Admin: **YFR**

Narrative: The fire was flown today under 0 percent cloud cover, with maximum temperatures in the 60`s, and winds were out of the northeast with peak gusts up to 8 mph. Fire behavior was smoldering and creeping, with group torching. The fire was reported as currently less than one mile west of allotments 7 and 8. Personnel mapped the fire from the air, providing an updated acreage. Actions for the day included two firefighters returning to allotment 6, the Rat Lake cabin, to provide possible cabin protection. Firefighters mopped up and secured allotments as needed. Helicopter 6PF remained unavailable due to mechanical difficulties. Tomorrow personnel will prepare for a possible burnout to protect allotments 7 and 8, as well as mop up and secure additional allotments as necessary.

 # 433 Name: **Upper Healy River** Cause: **Lightning** Admin: **FOR**

Narrative: A passing storm system brought heavy rains to the area for a short time. This significantly reduced fire behavior. As the weather cleared, crew shuttles began. Two helicopters worked on moving personnel and backhaul. The remaining paracargo was delivered. Eight smokejumpers were demobed as the type 1 crew started to arrive on the fire. One Type 2 crew was transported and a second will camp at DAF along with half of the hotshot crew for transport on 7/16 as smoke drifted in and made further flying unsafe. The transition from the smokejumpers to an ICT3 was initiated. The change in the weather and additional personnel should allow for faster containment and control.

Narrative: Zones were identified where tanker drops would be effective to slow the fire's growth, and minimize spotting potential North of the Chitina river. Also site protection was completed on two sites Southwest of Sunshine lake. The fire established good communications and now has complete coverage of the fire area, via command repeater. Utilization of the CL-215's and aerial supervision is planned for tomorrow if smoke conditions allow.

Narrative: Slow rates of spread today except in the white fir uplands where fire behavior was moderate. Single and group tree torching was noted. Two additional IHC's were flown in to the northern perimeter for direct fireline construction. All contingency lines have been completed and approximately 7 miles of handline has been constructed. This was the first day of clear sky which provided more accurate GPS mapping resulting in a reduction of acres from that which was previously reported. Two T2 Crews were demobilized.
