Narrative: A reconnaissance of the northern side of the Chitina River for potential spots from 7-19 burn period and general reconnaissance of fire area. No spots were observed on the north side of the river. The conditions were too poor for accurate mapping due to a heavy smoke inversion layer over the fire area. Two boat loads of Augusta IHC were shuttled down the Chitina River to the Nizina confluence for the operational period in support of potential aerial firing operations and reconnaissance. The resource advisor did aerial reconnaissance of the fire to assess any potential resource issues. Engine crews arrived and were briefed on the mission. The Pioneer Peak IHC crew arrived and is staged on a project nearby for a shift until they are worked into operations.
