#425 Name: **Wood River 1** Cause: **Lightning** Admin: **NOD**
Narrative: The fire made major runs to the north and northeast. Crowning, group torching, and spotting a quarter of a mile from the fire were observed. Burnout operations were conducted to secure along the Wood River due to predicted weather. Air attack and three CL-215 aircraft made water drops to help secure the line. Tomorrow personnel will continue the structure protection plan for cabins along Wood River. The fire will continue to be monitored and managed for resource benefit. (+8375.4)

#347 Name: **Rock Slough** Cause: **Lightning** Admin: **YFR**
Narrative: Crews continued mop up operations around allotments and structure preparations for a possible burnout. The fire received additional supplies and equipment via para-cargo. Fire behavior included creeping, smoldering and individual tree torching. Two helicopters were loaned to fire 359 for allotment and structure protection. The fire had received a significant amount of rain last evening which resulted in a decrease in fire behavior.

 # 314 Name: **Little Black One** Cause: **Lightning - WFU** Admin: **YFR**

Narrative: The Midnight Sun IHC was mobilized into the fire. Crews continued preparation around allotments and cabin sites for the planned burnout operation. The fire was backing through mixed hardwoods and spruce understory on the southwest side. On the northeast side of the fire it was backing in white spruce and tundra. The fire was also running to the north and northwest. Direct observation of the northwest perimeter was not possible due to heavy smoke and fire behavior. There was an estimated increase in acreage of +32,000 acres bringing the total to 170,000 acres.

Narrative: The fire was flown by zone surveillance in N309VS at 1416. They reported it as 30 percent active, backing and running in a spruce mix. Increased fire behavior due to dry and windy conditions caused the fire to begin moving through an old burn. Air attack, one load of fire retardant and two loads of smokejumpers were requested. Jumpers deployed at West Twin Lake and Wilderness Lake to implement structure protection and burn out operations.

Narrative: Values at risk continue to be Native allotments and cabins on the Tanana, Teklanika and Kantishna Rivers, and structures around Dune Lake and Teklanika Channel Lake. Native allotments on the Nenana River and the Arctic Wolf drilling site. Structures on Totek Lake and Comma Lake. Continued hot and dry weather and lack of precipitation combined with high winds today encouraged fire growth once again. 30-100 foot flame lengths were observed on the South and East flanks, where the fire continued to back actively in to the wind, causing multiple convective columns to form. Pockets of single and isolated group tree torching occurred on the North end of the fire.

 # 362 Name: **Chakina** Cause: **Lightning** Admin: **WSP**

Narrative: In the morning the fire was generally creeping with occasional flareups in heavy fuel concentrations. By 1500 some vertical development contributed to individual tree torching along the downwind (NNW) and eastern flanks. At approximately 1700, the fire established in the Chakina delta area began to increase in behavior and make a moderate run toward the Chitina River. Group tree torching was observed on the SSW flank. A strike team of DOF engines worked with local VFDs to begin detailed structure assessments of developed areas. The public preparedness plan was completed. Pioneer Peak IHC began structure assessments and area recon.

Narrative: Continued hot and dry weather and lack of precipitation combined with high winds today encouraged fire growth once again. 30-100 foot flame lengths were observed on the South and East flanks where the fire continued to back actively in to the wind causing multiple convective columns to form. Pockets of single and isolated group tree torching occurred on the North end of the fire. CL215s were used on the Southeast corner of the fire to limit spread toward the Teklanika River structures. A burnout was conducted on the East side of the fire to clean up pockets of unburned fuel. Smokejumpers on the Teklanika Channel Lake continued to protect the cabin there where a burnout was completed, and began mopping up around the site.
