# 425 Name: **Wood River 1** Cause: **Lightning** Admin: **NOD**

Narrative: The fire was reported as 50 percent active with growth primarily to the north and northeast. The fire made a significant run to the north with crowning and group torching observed. This extreme behavior resulted in a 7,000 acre gain for a total acres burned to date of 45,000. A load of smokejumpers was put out on the fire to burn out and mop up around structures located to the west and south of the fire along the Wood River. The fire continues to be managed for resource benefit.

Narrative: Crews continued mop up operations around allotments and structure preparations. A successful burnout around one cabin site near Rat Lake was conducted. Plans were made for crews to finish securing the areas around allotment 7/8 and around the Rat Lake site. Personnel will maintain previously installed allotment protection systems. The fire continued creeping and smoldering with some isolated torching. Helicopters were used to shuttle crews into allotment areas and boats were essential for accessing multiple allotments along the river.

Narrative: (269,477 acres) The command repeater was repaired today. Continued windy and dry weather and lack of precipitation contributed to active fire behavior again today. The logistical and operational difficulty of protecting numerous scattered remote allotments, structures, the Arctic Wolf drilling rig and its associated camp have complicated management of this incident. Continued hot and dry weather and lack of precipitation in the fire area have prolonged site protection actions. With little or no predicted moisture, active spread is expected to continue. The recent forecast is for increased temperatures, in the 90's, with the associated lower relative humidities and no forecasted precipitation will continue to hamper efforts.

Narrative: (108 Personnel) Minto Flats South fire resources continued to protect structures and allotments along the Tanana River and the Arctic Wolf drill rig site. The Chena IHC direct attacked the southeast corner of the fire to protect structures along the Teklanika River. The southern portion of the Minto Flats South fire reached a pre-established trigger point and resources were ordered to work on structure protection around Dune Lake. On the Minto Flats South fire, Tanana River resources will continue to protect structures, allotments and the Arctic Wolf drill rig. Teklanika River resources will continue direct attack on the fire's southeast corner to protect structures along the river. Resources at Dune Lake will implement structure protection.
