# 458 Name: **Big Creek** Cause: **Lightning** Admin: **YFR**  
Narrative: There are currently 3 sites near the fire that three smokejumper crews are working to protect. At site 2 (Dudley) smokejumpers finished burnout and mop up operations and prepared to be moved to another site. However, visibility prevented helicopters from landing for demobilization and the smokejumpers had to stay on scene. At site 6 (Webb) and site 10 (Cresto) smokejumpers began preparing the sites for burn out operations. One para-cargo order was received. Zone surveillance personnel made an attempt to map the fire at 1725 but, visibility was not conducive to aerial surveillance and an updated perimeter was not attainable.

Narrative: An Alaska Type 2 IMT (Doty) assumed command of the complex at 2300 7/29. The logistical and operational difficulty of protecting numerous scattered remote allotments, structures, the Arctic Wolf drilling rig and its associated camp have complicated management of this incident. Continued hot and dry weather and lack of precipitation in the fire area have prolonged site protection actions. With little or no predicted moisture, active spread is expected to continue.

 Narrative: At 1546 the fire was flown by zone surveillance personnel. The fire was more than 1,000 acres in size and 90% active. The fire had burned up and over the top of the ridge with group torching and spreading to the north and northwest and moving up the east aspect of the drainage. The fire had moved to within 500 yards of a repeater site. One load of smokejumpers was ordered for site protection. At 1800 smokejumper aircraft J-66 arrived over the fire but, due to proximity and fire behavior it was determined that no smokejumpers would be deployed. J-66 returned to home base without having deployed any jumpers. A request was made to have Air Attack and two CL-215's respond to the fire to deliver water and attempt to protect the repeater site. Air Attack B-7 and tankers 262 and 263 responded and delivered several loads of water which slowed fire progress and helped to decrease fire intensity near the site.
