[Railbelt Compl](#) Narrative: (State - 46752 ac.; NCA / 15,299 ac.) Evacuation will remain in progress for another 24 hour period, and extension will be evaluated at 1900 on 8/6/09. Difficult steep terrain dictates the need for Type 1 IHC Crews for direct attack. 4-5 foot flame lengths with ROS of 1 Ch/Hr. The head of the fire has burned into the 2001 fire scar and is rapidly progressing. There was light to moderate fire behavior on the Eastern flank due to SW winds. Evacuation is still in effect for the Windy Creek subdivision area. Fire growth slowed due to Southwest winds and the 2001 burn fuel type change. Dozers made good progress constructing line around all structures and from subdivisions East to the Kabina Lake cabins. Additional resources arrived throughout the day. Smoke Jumpers deployed structure protection equipment around Kabina Lake and are preparing for burn out operations.

Air operations were hampered because of smoke. Direct attack activities will continue in Div E/G/H and I. Containment of the spot fires along the Teklanika River and the slop over in Div H in close proximity of the Arctic Wolf Drilling site will continue to be the priority.

Narrative: Personnel in helicopter 83230 flew a recon mission in the area and located cabins and allotments ahead of the fire. Resources have been ordered to conduct cabin/allotment protection. N1010F flew the fire again today. The fire had received rain which significantly reduced the fire behavior. Heavy smoke on the northern perimeter prohibited mapping of that area. Personnel are still unable to calculate acreage gain due to the limited visibility.
