Narrative: Widespread dense smoke conditions limited helicopter capability, hamper forward scouting, ability to track perimeter growth, and contributed to a public health concern. Visibility has also limited logistical support via air into the Circle Airport. Fire behavior included individual tree torching and ground fire with 2-3 foot flame lengths. Crews back hauled and completed line in the 12 Mile Bluff area on the Little Black Fire. The digitized fire perimeter was updated revealing a new total acreage of 344,453 acres.

Narrative: State - 493,978 ac. / Native Lands - 24166 ac. The Minto Flats South Fire has the potential to move East towards the Arctic Wolf Drilling site and Southwest along the Teklanika River as well as South towards the Totek Hills and East towards the town of Nenana. Numerous spot fires along Divisions H and I were not supported by aerial resources due to smoke. Smoke is impacting Fairbanks, Anderson, Clear Air Force Base, Minto and outlying areas. The fire threatens Doyon Corporation's Arctic Wolf gas drilling site, the State of Alaska and Toghothele Corporation owned timber plantations / sales. Future smoke concerns are possible highway closure, long term firefighter health impacts and railroad closures. Due to the inversion aerial resources were not used. Containment of the spot fires along the Teklanika River and the slop over in Div H in close proximity of the Arctic Wolf Drilling site will continue to be the priority on the Minto Flats South Fire.
