897 Name: **Crazy Mountain Complex** Cause: Lightning Admin: NOD

Narrative: There was continued smoldering throughout the Complex and disorganized movement/spread as flare ups within jackpots and teepees continue to burn out. Fire 489, Puzzle Gulch, was not aerially mapped due to a low ceiling and snow falling above 3000 feet. Bluff Creek, Jagged Ridge and Little Black One were monitored by air attack. Perimeter along north and east sides of Jagged Ridge Fire is convoluted with many fingers and steep creek banks. The perimeter is harboring numerous spots and jack potted timber. There is high resistance to control. Drought codes and temperatures have moderated. Temporary travel restrictions are still in place on the Steese Highway between Milepost 147 and 161. The highway has fire on both sides with numerous trees falling onto the road bed. Unmanned aerial systems (U.A.S.) data and outputs are available on Inciweb via the Complex site, then refer to "related incident links".
