The fire was 80% active today, running to the south, with torching and creeping on the tail and flanks. It is burning actively in dead grass and downed fuels in a 2002 burn area. Two T1 crews and an additional load of smokejumpers arrived on the fire today, and personnel protected allotments utilizing a combination of handline, hoselay and natural barriers. Smokejumpers utilized watercraft to reach residences south of the fire to begin structure protection. There are 2 allotments adjacent to the fire, and six structures and one allotment to the south of the fire, with 17 structures to the north and west. The fire exhibited high resistance to control, and low RHs, high temperatures and high winds created unfavorable conditions for cabin and allotment protection. There have been no structures lost, and the fire is approximately 1% contained. (+10891)
