Narrative: The fire was creeping and smoldering today with no apparent growth. Base camp was moved to Ft. Yukon. Tomorrow, crews will continue to conduct mop-up operations. Hot, flashy fuels, low relative humidity and shifting winds remain a concern. The fire is 50 percent contained and demobilization is expected to occur on 5/27/2010 given the current management strategy.

 # 128 Name: **Toklat** Cause: **Lightning** Admin: **L&W**

Narrative: The fire exhibited moderate to high rates of spread to the south toward structures along the Kantishna River and Mucha Lake and creeping and backing on all other flanks. Due to the increased activity, the Chena IHC was mobilized to Mucha Lake to assist smokejumpers with structure protection preparations. Fire personnel continued to secure burn-out operations and complete indirect line at H-40. Personnel continued mop-up near H-10 and H-30 where faller teams assisted with snagging. Structure protection was completed at East Twin Lake. Tomorrow, firefighters will continue structure and allotment protection on Mucha Lake, East Twin Lake, and along the Kantishna River. They will continue to mop-up line 100 feet in the black near H-10 and increase the depth of the burnout southeast of H-40. Indirect line and mop-up along line near H-40 should be completed, and a Type 1 Crew will be demobilized out of H-40. Due to predicted winds from the southwest threatening northeast fire growth, it is critical to keep the Type 2 and Type 3 helicopters currently assigned to the fire. Due to the size of the fire and the distance between values at risk, smokejumpers and aerial resources will be key for structure protection and assessment activities. With one Type 1 Crew timing out on 5/26 and another Type 1 Crew timing out on 5/31, it is important to replace them with Type 1 or Type 2 IA Crews. The fire increased by approximately 571 acres.
