Narrative: Fire spread moderated by weather patterns and smoke inversion. Smoke lifted allowing for the accomplishment of backlogged aviation missions. Attempted burnout operation on East Twin Lake, weather limited success. Lifting of smoke allowed observation of south flank of fire, confirming that fire #128 and #241 had grown together. Inserted Gannett Glacier crew into structures 1 mile west Bear Paw, to begin structure protection preparations. Plan to hold lines and spot fires around Mucha Lake with indirect sawline and hoselays around the cabins. Resources at structures 6 miles North of the Bearpaw River will monitor the fire's southerly progression and prep residences. Snake River IHC and Gannett Glacier crew will continue to prep residences in the Bearpaw river area for structure protection and burn out operations. (+6595 acres).

At choke point across from Rhone Baumgartner's cabin the point hasn't burned, it also is spruce/hardwood mix. The perimeter from the Kuskokwim around to the Farewell Strip shows a few areas and pockets of smoke (smoldering and creeping). From Farewell Strip up Sheep Creek the fire has burned to the East Bank and is holding, the main spread continues up Sheep Creek into the mountains. (+25,545)
