**# 222** Name: **Chitanatala** Cause: **Lightning** Admin: **L&W**

Narrative: Smokejumpers and hot shot crews worked to lay 90 percent of the hose-line in preparation for burnout operations when conditions are favorable. Type 2 crews worked to mop-up previous burnout operations. Two smokejumpers were moved to another cabin to assess and prepare the structure and eight helitack personnel were inserted to property along the Cosna to begin structure protection. The fire was receiving light rain showers which will likely prevent firefighters from burning out until fuels become drier. The fire remains approximately one to one and half miles to the northwest of the fire.

# 128 Name: **Toklat** Cause: Lightning Admin: L&W

Narrative: Thunderstorm winds resulted in increasing fire activity threatening multiple structures to the South and West Side of the fire. Distances between operational areas are increasing, as the fire progresses south and west. Fire spread limited to smoldering and creeping due to precipitation received overnight. Lifting of smoke allowed observation of entire fire, confirming that fire #128 and #241 had grown together. Inserted Gannett Glacier crew into structures 1 mile west Bear Paw, to begin structure protection preparations. The plan for 6/3 is to hold lines and spot fires around Mucha Lake with indirect sawline and hoselays around the cabins. Resources at structures 6 miles North of the Bearpaw River will monitor the fire's southerly progression and prep residences. Snake river IHC and Gannett Glacier prepping residences in the Bearpaw river area for structure protection and Burn out operations. Assess structures in and around Jon Hansen Lake. Continue to aggressively monitor fire progression toward West Twin Lake to determine opportunities to take action. Continue burnout operations around structures at West Twin Lake.

Narrative: Zone surveillance in N756ZV flew the fire and reported it was 70 percent active. The majority of the fire behavior was smoldering with some intermittent, single-tree torching. Winds were out of the east-southeast at five to ten miles per hour. The fire had moved into the Clear Lake burn scar. The northernmost portion of the perimeter in that area was backing and torching. The fire has also burned into the Carla Lake burn scar from '93 and is burning well on the hillside where aspect and slope can affect fire behavior. The fire is moving slowly in the flats. (+300)
