 # 275 Name: **TATALINA RIVER** Cause: **Lightning** Admin: **L&W**

Narrative: Fire behavior was observed as smoldering, creeping and group torching on the northwest and south flanks of the fire. Crews were able to achieve 70% containment. Visibility was limited at times due to smoke from other fires located to the north and south. A Line EMT is in place at the Tatalina helibase. The sawtooth IHC moved to H-5 and continued fortifying the fire line. A new helispot was created near H-5. Allakaket #2 and Venetie #2 moved to H-25 and Hughes moved to H-80. Fire personnel suppressed a 10 foot x 10 foot spot fire on Division B. Bears were sighted in camp at H-80.

Narrative: An evacuation advisory was issued for residents of the Hayes Creek Subdivision. Burnout operations occurred on the East side of the fire. Aviation assets assisted with slowing the fire's growth along the east flank. Fire continues to advance on the East side along the dozer line at the top of the ridge. Boats are assisting with structure protection on the Chatanika River. Preparations continue in the McCloud subdivision and along Old Murphy Dome Road. Dozers will continue constructing contingency lines east of the fire. Crews will continue constructing direct line on both the west and south flanks. Structure protection efforts will continue along the Chatanika River. Crews will continue structure protection efforts in Hayes, McCloud, and Desperation Loop. There is Red Flag Warning for strong winds in effect tomorrow from 2PM to 10 PM. Winds from the SW 8-15 mph with local gusts to 25mph. 25,464 gallons of retardant were dropped by airtankers and Ducks dropped 39,000 gallons of water.

207 Name: **East Volkmar** Cause: **Lightning** Admin: **Doyon**

Narrative: The fire remains 6% contained and showed a small increase in size. Eleven loads of retardant were dropped in the afternoon to re-enforce containment lines. There was one non-emergency medivac. Efforts have shifted to finish the perimeter containment south of the South Fork of the Goodpaster River. The structure protection preparations are continuing with planned movements of equipment and materials to pre-identified caches at the earliest opportunity. One crew will be inserted into the needed areas to assist with the movement of necessary items. The interior had active burning as well as small portions of the north and east perimeters, following the spruce stringers. The NW perimeter behaved well, with westerly winds, allowing significant progress at perimeter control. Crews reengaged on west perimeter south of the South Fork of Goodpaster River, with the aid of air support. Retardant and water were used to check fire spread on active areas of the north and south perimeters. For the next operational period it is expected to continue perimeter control on west flank south of the South Fork of the Goodpaster River with crews and air support. Move equipment and materials for structure protection to pre-identified caches as opportunities arise.
