Narrative: Ducks T-267 and T-262 were launched to the fire along with Air Attack 1AK to aid with suppression. Jumpship-12 was launched to the fire and deployed another 8 smokejumper's. The Venetie and Beaver-Stevens type-2 crews were mobilized to the incident out of Venetie. The fire also ordered para-cargo which was delivered by J-07. The IC last reported the fire at 54 acres, creeping and smoldering with single tree torching. The dead and down caused control problems throughout the day as ground personnel struggled to keep the fire out of the black spruce. (+4)

Narrative: A change in the weather allowed for increased smoke around the fire area thus limiting visibility. Fire behavior, fuel conditions, terrain and limited access are hampering control efforts.

East Flank - 1-3` flame lengths, single tree torching. West Flank- 3-5` flame lengths, single and group torching. North Flank - 1-3` flame lengths, smoldering and creeping. South Flank - single tree torching, smoldering and creeping.

Cooler temperatures, higher RH`s, and reduced wind speeds aided firefighting efforts. The contingency line in McCloud subdivision was completed. Burnout operations on the east flank were completed. Crews on the west flank made good progress securing the line west from H-20

Dozers will continue constructing contingency lines into Chatanika River and into Hayes Creek. Crews will continue securing line from the burnout on the East side. Work continues on constructing direct line on both the west and south flanks. Structure protection efforts will continue along the Chatanika River. Crews will continue structure protection efforts in Hayes, McCloud, and Desperation Loop subdivisions.

Narrative: The fire is 9% contained and still displaying growth. There is a critical need within the next day for three Type I crews for three shifts to extend and secure the perimeter controlling to the NE from the South Fork of the Goodpaster River. Within 72 hours three Type I crews will be needed to prepare and conduct planned burnout operations on the south flank. The major concern for the day was catching yesterday`s slopover. Smoke and low fog laying in the valleys inhibited visibility over the eastern portions of the fire. An increase in acres can be expected once mapping is completed on this portion of the fire perimeter. After an active fire day yesterday, with fire spotting across the line for about 300 acres, today`s work focused on engaging crews back into this division and containing the slopover. This work was highly successful today, with the help of rain and less wind. For the next operational period it is planned to hold and secure the west perimeter (Divs A,B,G,H). Position equipment and materials in caches for structure protection continues. Scout opportunities to continue perimeter control moving northeast and southeast are planned.
